

The Perfect Gift For Curious Kids

Share your enthusiasm for astronomy and science by treating a child to the gift of *YES Mag: Canada's Science Magazine For Kids*. This award-winning magazine introduces kids' ages 8 to 14 to science, technology, engineering, and math in a fun and educational way. Every full-colour issue is packed with the latest science news, emerging technologies, Canadian content, do-at-home projects, and a stargazing column by *SkyNews* contributing editor Ken Hewitt-White.

Subscriptions are only \$22 (GST included) for one-year (six-issues).

A Great Resource For Schoolwork!

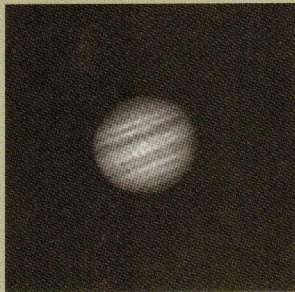

ROCK MALLIN (ALL)

CELESTIAL VIDEO

Samples of MallinCam video images through a 12-inch telescope (clockwise from top left): Ring Nebula (M57); star cluster M11; Jupiter. Camera produces brighter images and a wider field when system focal ratio is faster (shorter) than f/5. Schmidt-Cassegrain telescopes achieve this with an f/3.3 compressor.

VIDEO WITH YOUR TELESCOPE (CONTINUED FROM PAGE 18) This is an outstanding accessory for demonstrations for schools or clubs or anywhere that people line up to look through a telescope. ■

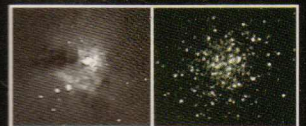

MallinCam CCD camera models start at \$789.95 and are available directly from Pro-Com Electronics Telescope Repair, 395 Richmond Road, Ottawa, Ontario K2A 0E0, 613-728-9197 (e-mail: rock.mallin@oaog.ca).

MALLIN★CAM VIDEO CCD CAMERA

- Provides 2.5 times the aperture of telescope at F/6 or less
- View live images of deep sky objects, lunar, planetary, double stars, occultations, satellites and more from light-polluted or dark-sky environment
- Excellent for group viewing, planetariums or museums
- Excellent for visually impaired observers
- Connect to any video monitor, television or VCR
